

To Residents of the City ~Inaugural Address from the Mayor~

Pleased to meet you all.

Given heartwarming support from lots of residents of the city, I have come to bear an important duty of municipal government operation. I will do my best to deal with residents' fervent expectations towards municipal government operation openly. Establishing "the Six Policies to Lighten Up Kawaguchi" bolstered up by my mottoes "Principle of hands-on management" and "Operations from the viewpoint of residents", I will devote myself to conduct the operation in which all the residents can find all-out satisfaction.

Served as a former member of both Municipal and Prefectural Assemblies, the principle of "Community problems are always lying on the ground" is always by my side. Holding this faith, I have always been trying to grasp the situations as well as tackle problems with the aid of lots of dialogues with residents. Backed with these experiences, I believe it is my duty to establish a reliable municipal operation system that goes side by side with all the residents.

While paying high regard to community planning of Kawaguchi City and its history built up by successive predecessors and great figures, I am determined to tackle with everything in all seriousness, acting flexibly to pace up the times. I hereby promise you all, with a firm resolution, that I will devote myself in performing "to make Kawaguchi the most brightened-up community".

In conclusion, I should like to say that an essential part, as well as the most significant role, of administrative operation is to return tax, which was paid by the sweat of each one's brow, in forms of administrative services not even wasting a single yen. As striving to create the city that is to be chosen and the residents can be proud of, I will never loosen the reins until you all can feel something has changed. I would be most grateful for your understanding and cooperation for the task I am just assigned.
